

SBL Security Policy for Meetings and Events

In the light of today's environment, all public gatherings should be conducted in such a way as to ensure public safety. SBL has developed policies and practices that it uniformly applies for meetings and events. These have included contact with local law enforcement, awareness of local emergency preparedness and safety procedures in hotels and convention centers, the presence of law enforcement personnel, and the availability of on-site medical services. Our attention to these matters has always been to provide rapid response for the safety, health, and wellbeing of members and event attendees. Should you have any questions or concerns, please direct them to the SBL Executive Director, on behalf of the SBL Council.
