“There Needs No Ghost, My Lord, Come from the Grave to Tell Us This”¹: Dreams and Angels in Ancient Egypt

Egyptology and Ancient Israel

John Gee
Institute for the Study and Preservation of Ancient Religious Texts
Brigham Young University

Abstract: A number of ancient Egyptian texts discuss the appearance in dreams of messengers who could be both benevolent and malevolent. Other texts discuss the sending of messengers to appear to individuals in dreams, or of preventing those messengers from appearing to individuals. This paper will discuss the ancient Egyptian use of dream sending and the messengers that appeared in them.

What Angel Wakes Me from My Flow’ry Bed?²

In a now lost letter to the dead, Merirtyfy writes to his deceased wife Nebetiotef: “Look, I am your beloved on earth. Fight for me! Intercede on behalf of my name! I did not misspeak a sentence in your presence when I performed your funerary rites.³ Expel my body’s illness! Please become an angel⁴ for me in my presence so that I may see you fighting for me in a

Due to an oversight on the part of The SBL Handbook of Style, the following standard abbreviations will be employed:
BD The Book of the Dead
GM Göttinger Miszellen
PT Pyramid Texts

My apologies to my Egyptological colleagues who will doubtless will be confused by the nonstandard abbreviations used by SBL. Also note that Demotic transcriptions will follow standard conventions for the discipline to the extent possible, although three of the characters are not listed in the SBLHS, and it is impossible to represent three of the characters using SBL fonts. Hebrew א will be used for Egyptian aleph (3) since it is not in the character set of the SBL fonts.

²William Shakespeare, A Midsummer Night’s Dream III.i.129.

³Literally: “when I caused your name to live on the earth.”

⁴The translation of ἀγγελος here relies on the Greco-Roman period equation of ἀγγελος and αγγελος; see John Gee, “B3 Sending and Its Implications,” in Egyptology at the Dawn of the
dream.”\textsuperscript{5} This First Intermediate Period connection of angels appearing in dreams also appears over two thousand years later in a Roman period ritual found in a priestly archive from Thebes\textsuperscript{6} identified as “another sort of dream sending.” In it the person to whom the dream is sent will stop sleeping “until a powerful angel who does not sleep at night is sent and stands before N in the secret form of the god whom he considers to be the greatest, and says to him: Get up and do X, the command of N! Do every thing he wants!”\textsuperscript{7} The appearance of angels in dreams thus spans almost the entire course of Egyptian history.

A thorough study documenting the changes, if any, in belief and practice over time is warranted for the whole subject,\textsuperscript{8} but the fact that the identical phenomenon appears in almost identical terms more than two thousand years apart shows that the phenomenon is a cultural constant, even though different types of evidence are available from different time periods. The treatment in this essay will therefore flatten the diachronic differences to get a picture of the phenomenon of angels appearing in dreams from the whole of Egyptian civilization.

\textsuperscript{8}See also Kasia Szpakowska, \textit{Behind Closed Eyes: Dreams and Nightmares in Ancient Egypt} (Swansea: The Classical Press of Wales, 2003), 4.
Art Thou Some God, Some Angel, or Some Devil?9

The Egyptian term for angel is ’h. The term “designates entities or beings . . . [and] their (spirit-)state and the power emanating from them.”10 It was part of a larger spiritual world. The Egyptian spirit world was generally divided into three classes:11 gods (ntr, θεός), angels (’h, ἄγγελος, πνεῦμα ἄρειον), and demons (mwt, δαίμων). The larger category of these beings was the spirit (b’, ψυχή, πάρεδρος). When an individual died, his or her soul (b’, ψυχή) either became an angel (’h, ἄγγελος) or a demon (mwt, δαίμων) depending on whether the proper rites had been performed, and whether he or she had lived properly.12

The term ’h is frequent in the Sixth Dynasty with many deceased officials identifying themselves as an ’h.13 The term was seen as religious in nature, parallel to the lector priest.14 Both were noted for their knowledge of secrets (sšt’), powers (hk’) and texts (r’).15 They were

beings for whom all the proper rituals were performed.\textsuperscript{16} We know the content of these rituals, they are called \textit{s’hw} texts, that is texts for “making one an angel,” and both the Coffin Texts\textsuperscript{17} and the Book of the Dead\textsuperscript{18} explicitly identify themselves as \textit{s’hw} texts. By extension, since the Coffin Texts called \textit{s’hw} are also used in the Pyramid Texts,\textsuperscript{19} those texts can also be classified as \textit{s’hw}.

That an angel could appear as a god is noted in many Roman period texts,\textsuperscript{20} but he was actually something else: “know that he is divine; it is an aerial spirit that you see” (γινώσκεται ὅτι οὗτος ἐστὶν ὁ θεός. πνεῦμα ἐστὶν ἀερίου ὁ ἐδεισ).\textsuperscript{21} The angel had many powers:

he sends dreams, leads women and men without substances, kills, destroys, hurls winds up out of the earth, carries gold, silver and bronze, and gives them to you when the need arises, loosens the bonds of those fettered in prison. opens doors, makes invisible so that

In English, the term “angel” is used to mean “a ministering spirit or divine messenger;
one of an order of spiritual beings superior to man in power and intelligence,”72 whereas in Greek the term ἄγγελος means simply “messenger” without any spiritual overtones.73 Since in all cases under consideration, the messengers in the Egyptian texts represent “spiritual beings superior to man in power and intelligence,” use of the English term “angel” is justified.

Ancient Egyptian texts refer to the appearance of all three spiritual entities in dreams, sometimes by the generic terms (b’, πάρεδρος), which can be translated as “ghost”74 which I will use as the generic term in this paper.

To Sleep Perchance to Dream75

Thirty rituals for dream oracles have come from Roman period Egypt.76 But these rituals are said to be “handed do[wn to us in] numerous scrolls” (καταλείπομενα ἐν βιβλίοις μυρίσεα).77 reflecting a compilation of previous traditions. Requests for dream oracles involving Egyptian gods (Pre Φρη, Ptah Φθα, Horus-Khenty-Khety Ἄρχεντεχθα, Seth Σηθ)78 could

involves lamps set up for divination.\(^79\) The lamp used was either a special one prepared for the occasion or the one used in the daily temple liturgy (τὸν λύχνον τὸν καθημερινόν).\(^80\) The lamp is used as a conduit for the dreams, just as it was used as a conduit for divination.\(^81\)

**Such Stuff as Dreams Are Made on**\(^82\)

In the Middle Kingdom, the instructions we have for the use of “an image of clay of . . . upon which the name of a man has been placed”\(^83\) in a rite for sending a dream in which a soul would appear to someone and deliver a message. In the Roman period, a figure is made of wood into which the name of the individual to whom the dream should be sent is placed so that the spirit might “stand before her, having the likeness of the god or daimon whom she worships, and say what I desire.”\(^84\) Examples of the clay figurines with the names written on them have

analysis of this material is beyond the scope of this paper\textsuperscript{100} other than to raise the question: Why does a mummy need an amulet to summon dreams? “In that sleep of death what dreams may come?”\textsuperscript{101}

I Have Had a Most Rare Vision. I Have Had a Dream, Past the Wit of Man to Say What Dream it Was\textsuperscript{102}

Far from adapting a Viking view that “there is no meaning in dreams,”\textsuperscript{103} for the ancient Egyptians dreams could be interpreted. They can be interpreted precisely because messengers, such as angels could appear in them and take on any form they desired.\textsuperscript{104} Two manuals for the interpretation of dreams have survived. One dating to the New Kingdom\textsuperscript{105} belonged at one time

\textsuperscript{100}I intend to deal with this in part in another paper.

\textsuperscript{101}William Shakespeare, \textit{Hamlet} III.i.65.

\textsuperscript{102}William Shakespeare, \textit{A Midsummer Night’s Dream} IV.i.204-206.

\textsuperscript{103}“Ekki er mark að draumum.” \textit{Gunnlaugs Saga Ormstungu} 2. The phrase is not exactly true of the Vikings either, as the rest of \textit{Gunnlaugs Saga Ormstungu} shows, Þorstein’s dream comes to pass.

to the family of Qenherkhopeshef, the other dating from the Roman period. In both cases, the relationship between the dream and the interpretation is often obscure if not opaque to us without the requisite cultural background. For example, one of the more curious pairings is that “if a man sees himself eating donkey meat (\textit{iwf n "} in a dream, it is good since it is his promotion (\textit{s "})).” The cultural context of this passage is found in the Book of the Dead, where the donkey devourer (\textit{" m "}) is the one who punishes sinners (\textit{isftyw}) for their evil deeds, and who is repulsed only by an individual’s purity. The individual notes that “I have no sins on record (\textit{nn isfr=i r \textquoteleft n sh})” Many officials make similar statements in connection with their promotions to office, that is they note that they received their appointments to office because

---

Volten gives two other examples of dream texts that are not actually dream texts: P. Cairo 50138, 50139, 50140 and 50141, in Wilhelm Speigelberg, \textit{Demotische Inschriften und Papyri III}. (Berlin, 1932), 98-103 and Tafel 59. Volten (\textit{Demotische Traumdeutung}, 5) suggested this was a dream interpretation text.

Both these texts have been reclassified as “other divinatory texts;” see Mark Depauw, \textit{A Companion to Demotic Studies}, Papyrologica Bruxellensia 28 (Bruxelles: FERE, 1997), 108.

109 BD 40.

110 BD 40.
they were free from blame. Thus there is more than just the word play between donkey (םָמֵן) and promotion (וֹכַּת) here, there is a common cultural context that covers nearly two millennia.

A similar Egyptian cultural background and its use in dream interpretation also figures in the biblical story of Joseph and his interpretation of Pharaoh’s dreams. In Pharaoh’s first dream he sees seven heifers (פָּרוֹת) devoured by seven other heifers. In his second dream he sees seven ears of grain (סִבְבָּלִים) devoured by seven other ears of grain. Pharaoh summons the chief lector priests of Egypt (חַיְּתִמֶּה מִסְרָיִם = חַיְּתִמֶּה הָבָה תִּפְּלִים), who by virtue of their being lector priests were both literate and had access to things like the dream manuals. Although they are unable to interpret the dream, Joseph, who previously had the reputation as an interpreter (פִּיוָר) of dreams, is able to do what the king’s advisors are not, which is an Egyptian literary trope. Pharaoh’s dreams do not involve Hebrew word play, instead they

115 Genesis 41:5-7.

116 For the equation, see Jan Quaegebeur, “On the Egyptian Equivalent of the Biblical *Hartummim*,” in *Pharaonic Egypt, the Bible and Christianity*, ed. Sarah Israelit-Groll (Jerusalem: Hebrew University, 1985), 162-72.

117 Genesis 41:8.

118 Genesis 40:5-23; 41:14-36.

119 For the trope, see Anthony J. Spalinger, *Aspects of the Military Documents of the Ancient Egyptians* (New Haven: Yale University Press, 1982), 101-14. For the private version of this trope where it is a priest rather than the king that can do what the advisors cannot, see P.
involve Egyptian cultural background. The seven heifers bring to mind both the seven Hathors—who is depicted as a cow or cow-headed goddess\textsuperscript{120}—with their ability to predict the future,\textsuperscript{121} and the seven cows in the Book of the Dead who give bread and beer\textsuperscript{122}—both derived from barley and wheat,\textsuperscript{123} the major cereal crops of Egypt.\textsuperscript{124} The hieratic forms of the ear of grain and the sign for \textit{hsbt} “regnal year”\textsuperscript{125} are graphically similar.\textsuperscript{126} Thus the dreams both focus on food production, but one emphasizes the futurity of the events while the other indicates that years are involved. Both dreams can be argued to be the work of angels who can transform

\end{footnotesize}
themselves both into barley, and into bovines. The Egyptian elements can also be used to date the story: although neither the graphic similarities in hieratic nor the literary trope are useful for dating, the transformation into barley and bovines appears mainly in Middle Kingdom texts, and Book of the Dead 148 has a Middle Kingdom antecedent, all of which argues for a date before the New Kingdom.

While P. Chester Beatty III notes what happens if a man sees himself in a dream there are other entities that can be seen in a dream. Worthy of note is the section in P. Carlsberg 14 dealing with the appearance of snakes in dreams. The snake was one of the forms in which an angel could appear, and most snakes were considered the manifestation of a deity.

Unfortunately, the interpretive portion of the papyrus is lost so we cannot match the

127 ECT 269 IV 6-7.

128 ECT 208 III 161-62.

130 The key question in this passage is what it means to see oneself in a dream. Does one see oneself from inside or outside oneself. If one sees oneself from outside, since an angel can take whatever form desired, there is nothing to say that an individual could not be seeing the angel transformed into the individual. On the other hand, if one sees oneself from inside, the way one sees oneself while awake, then one cannot postulate that the self one sees is an angel. Szpakowska (Behind Closed Eyes, 18-22) discusses the role of seeing in dreaming but neither the evidence she brings forward nor her discussion elucidates the issue, although her statement, “the dream was an autonomous phenomenon, external to the dreamer, which existed as a spatial dimension” might be taken to mean that the dreamer views himself or herself from the outside.

132 ECT 374 V 37; BD 87.

interpretation of a particular snake with the deity for which it is a manifestation. We can, however, match the things seen in dreams with the forms in which angels could appear. Since seeing a god in a dream was a good thing, it is noteworthy that when “a powerful angel who does not sleep at night is sent and stands before” an individual in a dream, it is “in the secret form of the god whom he considers to be the greatest” that the angel delivers his or her message. The recipient of the dream is assured “know that he is god . . . whom you see” (γινώσκεται ὁτι σύντοσ ἐστιν ὁ θεός . . . ὁ ἐκδεσ).136

**Our Little Lives are Rounded with a Sleep**137

Although an angel could appear in a waking state, the principle way was in a dream. The message delivered by the angel could be extensive, for which we have an historical example. In 1942 B.C., the founding pharaoh of the Twelfth Egyptian Dynasty, Sehetepibre Amenemhet

\textsuperscript{141}The death is recorded in Sinuhe R5-6, in Roland Koch, \textit{Die Erzählung des Sinuhe} (Bruxelles: Fondation Égyptologique Reine Élisabeth, 1990) 4. That it was an assassination may be found in P. Milligan 1/7-2/7, in Aksel Volten, \textit{Zwei altägyptische Politische Schriften}, \textit{AAeg 4} (Copenhagen: Einar Munksgaard, 1945), 108-12.

\textsuperscript{142}Clear from the line \textit{in imy k\textsuperscript{3}=i ir tswt} in P. Milligan 1/7, in Volten, \textit{Zwei altägyptische Politische Schriften}, 108.

\textsuperscript{143}Robert K. Ritner, \textit{The Mechanics of Ancient Egyptian Magical Practice} (Chicago: Oriental Institute, 1993), 199-201. Ritner imagines that the entire family of the vizier Intefiqer was involved in the harem conspiracy, fell from favor and was execrated. Ritner finds evidence for this proposition in that the vizier Intefiqer did not survive the reign of Amenemhet I because there is no mention of him in later inscriptions. Unfortunately, Ritner’s assertion is based on the fallacy of negative proof, and is not true. The vizier Intefiqer is mentioned in a graffiti in the Wadi el-Hudi datable to year 20+x of Sesostris I, between ten to eighteen years after the death of Amenemhet I. The inscription is found in Ashraf I. Sadek, \textit{The Amethyst Mining Inscriptions of Wadi el-Hudi}, 2 vols. (Warminster: Aris & Phillips, 1980), 1:22-24, #8. A full discussion of the survival of Intefiqer as vizier into the reign of Sesostris I may be found in Georges Posener, “Le vizir Antefoqer,” in \textit{Pyramid Studies and Other Essays presented to I. E. S. Edwards} (London: EES, 1988), 73-77; see also Detlef Franke, \textit{Personendaten aus dem Mittleren Reich (20.-16. Jahrhundert v. Chr.)} (Wiesbaden: Otto Harrassowitz, 1984), 119-20. Franke finds no incontestable evidence for Intefiqer under the reign of Amenemhet I.

\textsuperscript{145}

Never Harm, Nor Spell, Nor Charm Come Our Lovely Lady Nigh\textsuperscript{147}

Since an angel appearing in a dream could be both beneficent and maleficent, for desired or manipulative ends, bad dreams, or their appearance, were something to be avoided. With all the dispatching of dreams, there needed to be ways of warding off unwanted night visitors. In the Middle Kingdom, the Execration Texts are directed against “every bad dream.” From the New Kingdom we have a ritual to “drive away every bad dream that [a man] has seen.”\textsuperscript{148} We also have several amulets from the Third Intermediate Period designed to prevent bad dreams, especially the appearance of demons in one’s dreams,\textsuperscript{149} and gold cases for carrying such papyrus amulets.\textsuperscript{150} Such phylacteries last through Roman times.\textsuperscript{151}

Flights of Angels Sing Thee to Thy Rest\textsuperscript{152}

Angels were an important component in ancient Egyptian dreams. As carriers of good and bad messages, they were welcomed with good news and feared with bad. Angels and other ghosts could be summoned or sent to deliver messages in dreams. Many of the dreams and interpretations thereof become meaningful as the angels involved are taken into account. As

such, dreams became a contact point between the mortal and divine realms. Dreams thus could become a situation where the boundaries between this world (\textit{tp-t'}) and that world (\textit{hrt-ntr}) were permeable and messages could pass between.
